# Rambler

Vol. 1, No. 7

Nov. 58

## MEETING

Time: Thursday, 13 Nov. 58, 20:15 hrs.  
Place: N.R.C. Susses St., room 3039.  
Program: Demonstration and Explanation of  
T.M.C. Single Sideband Equipment.

TMC have kindly consented to bring this gear down and let us have a look inside. With the increasing use of SSB in home and mobile equipment it is a good thing to know more about what is available in this line.

There will be a couple of other things to be discussed such as: Civil Emergency Schemes and Planning; future activities for the winter; the next social evening.

An innovation at this meeting is to be the drawing for a very valuable door prize. We can assure you that it will be an asset to any station -- fixed or mobile.

## SPLATTER

Seems like we had a pretty fair hiding place for the transmitter on the Nov. 9 hunt. Or at least so Tom, 3CCA, thought so until 3BON, Tony, and 3DY found him. You know the hidden transmitter operator has a very harrowing job since all extraneous noises (that's QRM plus noises) could be someone sneaking up from behind. The milages recorded were: 3BON, 12.0; Tony, 12.2; 3DY, 10.5. Others who tried but didn't quite make it were: K5IJV, 3BST, 3GX. 3BZI and Gordon McKone, President of the RA Radio Club joined us for coffee later.

During the recent Slater Street disaster there was a mobile net operating within an hour and the Chief of Police notified of its existence. The facility was not used however and the net was disbanded at about 11:30 hrs.

Six meters has been open recently and promises to get better. Anyone for 6 or 2 mtere mobile? See 3DY or 3AFO.
