MEETING: 7.00 PM THURSDAY AUGUST 10 1961

PLACE: VINCENT MASSEY PARK (off Heron Road)

PROGRAMME: Business

Report on Emergency Measures Organization workshop and club house (?) by VE3BYT
Demonstration of Heath Transistorized Communication Receiver by VE3CGD
Publicity chairman will report on future newspaper article on the club (VE3DMT)
Coffee and light refreshment will be available. An AC generator will supply power for lights.

INCORPORATION : This will be started during the first weeks of August. Approximately fifty percent of the money required has been raised and this will be turned over to the law firm which is processing our charter. The rest of the money will have to be raised as quickly as possible, so please bring an extra dollar to the meeting or mail same to Graham VE3BYT if you have not already done so.

VHF MOBILE : Doug VE3CDC has written letters to half a dozen outfits who have mobile radio units available (taxi type). These normally are in the 149-160Mc range and are easily converted to 144mcs. Various companies at times have practically given away such units, in some cases to chartered clubs only, but the fact is that they are available if we are at the right place at the right time. These letters explaining our club activities, our interest in using these units for communication and emergency use, will ensure that we are remembered when such units are to be written off.

POT HOLE NET CERTIFICATES: More certificates are available. How about picking them up at the meeting? They were well earned, so they should deserve a prominent spot in the shack. The new contest for total points started on July 1st - let's see who gets CQ or QST this time.
